

The logo features the word "RAOH" in a large, bold, white sans-serif font. The background is a dark teal color with abstract, lighter teal geometric shapes, including a large circle and several triangles, creating a layered effect.

RAOH

— R e s e a r c h e r s —

RESEARCH. DISCOVER. IMPACT.

Advancing knowledge.
Creating real-world impact.

Choosing the Right Journal

Selecting an appropriate journal is an important step before manuscript submission.

1. Review Similar Published Studies

Search for studies similar to your topic and identify the journals in which they were published.

This helps determine:

- Whether the journal publishes research in your field.
 - The types of studies accepted by the journal.
 - The expected quality and scope of submissions.
-

2. Verify Indexing

Ensure the journal is indexed in reputable databases.

Common examples include:

- Scopus
- PubMed/MEDLINE
- Web of Science

Many researchers prefer journals indexed in Scopus because they are widely recognized by universities and academic institutions.

3. Check the SJR Ranking

The SCImago Journal Rank (SJR) indicates the journal's scientific impact and ranking.

Common quartiles include:

- Q1 = Highest-ranked journals
- Q2 = High-quality journals
- Q3 = Moderate-ranked journals
- Q4 = Lower-ranked journals

Always verify the journal's current SJR ranking before submission.

4. Check APC (Article Processing Charge)

Many journals charge publication fees known as APCs.

Before submission, review:

- Whether the journal charges APCs.
 - The exact publication fee.
 - Any available discounts or waivers.
-

5. Beware of Predatory Journals

Predatory journals often:

- Promise unrealistically fast acceptance.
- Have weak or nonexistent peer review.
- Lack reputable indexing.
- Send aggressive email invitations.
- Misrepresent their impact metrics.

Always verify the journal through trusted databases before submitting your work.

Quick Checklist

- ✓ Publishes research similar to your study.
- ✓ Indexed in reputable databases (e.g., Scopus).
- ✓ Appropriate SJR quartile.
- ✓ APC is acceptable and transparent.
- ✓ Not a predatory journal.
- ✓ Journal scope matches your manuscript.

Golden Rule

Find where similar high-quality studies are published, verify indexing and SJR, check APC fees, and avoid predatory journals before submission.
